Project 2 Example (provided by professor)

NIST CSF Functions and Categories

Challenges Faced

- We faced difficulties in understanding how to conduct the Gantt chart dates and time frames
 - o We eventually figured out how to do the dates, but it took a lot of time and consideration. We tried to utilize the example given to us in order to help us with this step
- We faced difficulty in initially starting our project, since there were many factors to consider
 - o Once we had the framework done, it was easier to do things for the project. For example, once we had done our Security Program Development section it was easier to create our Gantt chart
- We also faced some challenges in designing our project to fit a certain aesthetic
 - o We eventually found some colors and palette that felt right.
